**Java**

```java
class Solution {
    public boolean checkStrings(String s1, String s2) {

    }
}
```
----------------------------------------------------------------------

**JavaScript**

```javascript
/**
 * @param {string} s1
 * @param {string} s2
 * @return {boolean}
 */
var checkStrings = function(s1, s2) {

};
```
----------------------------------------------------------------------

**C++**

```cpp
class Solution {
public:
    bool checkStrings(string s1, string s2) {

    }
};
```
----------------------------------------------------------------------

**C#**

```csharp
public class Solution {
    public bool CheckStrings(string s1, string s2) {

    }
}
```
----------------------------------------------------------------------
